Breastfeeding Awareness Poster Display 2026-27 (03 October 2026)

The Department of Home Economics organised a Breastfeeding Awareness Poster Display in the college foyer on 3 October 2026 to promote awareness about the importance of breastfeeding for the health and well-being of both infants and mothers.

SYBA students actively participated in the initiative by creating informative posters and slogans. The displays highlighted the benefits of breastfeeding, infant growth and immunity, mother-child bonding, and the importance of maternal nutrition during the breastfeeding period.

The activity effectively conveyed important health messages and helped create awareness about the vital role of breastfeeding in ensuring optimal growth, nutrition, and development of infants.
