

4-day Online Workshop on Developing and Uploading E-content
in association with Whitecode Technology Solutions Pvt. Ltd

Resource Person: Dr. Vishwanath Bite, Assistant Professor, Government of Maharashtra's Rajaram College, Kolhapur

Dates: December 9,15,22 2020 and January 19, 2021

Time: 3pm to 5 pm on all days

Rationale:

The Swayam: India's national MOOC platform, offers opportunities for students across states at various levels of learning; to choose a course that is most suitable and obtain a certificate/ diploma or even a degree via the online mode. It also offers opportunities to teachers to become contributors and create and upload courses on the platform reaching to many students across the country. The UGC also suggests that Swayam courses be made a part of the regular curriculum in colleges and schools. The current pandemic has impelled the teaching faculty to change their pedagogy from classroom teaching to using a digital platform. The faculty has been using the online mode for teaching and evaluation as well.

Though the teaching community quickly adapted to the sudden change, it is essential that continuous training in using different software, updating knowledge about the various learning platforms which in turn will enhance the experience of online learning for the students is made available for the faculty.

The 4-day workshop on **Developing and Uploading E-content** provided guidance and training to the teachers in creation and uploading of e-content. The workshop was interactive and practical oriented. The teachers were familiarised with a number of tools useful for the TLE such as blogs, websites, Open Broadcast System, recording audio/videos, Google Classroom, Kahoot and so on. Dr. Bite demonstrated the use of ICT tools to create content. Teachers participated by making the e-content and uploading the same on the LMS platform of WhiteCode called SnowPandit as part of their assignments and also on the blogs and websites created by teachers. During the final session, teachers received feedback on how to enhance the e-content created.

We hope that the workshop will encourage the teaching faculty to experiment with the innumerable online resources with the gadgets available at home and create interactive, vivid and enriching learning experiences for their students. We also hope that the faculty will be motivated to design and construct courses and become resources for the Swayam learning portal.

A total of 80 teachers from Smt. MMP Shah Women's College of arts and Commerce and Dr. BMN College of Home Science participated in the training program.
